

# WALL PROTECT DAMP ABSORBER

A damp absorber that can be used again and again

## Product description

It is a dehumidifier that can be used over and over again. This makes the Wall Protect Damp Absorber an environmentally-friendly and sustainable absorption product. It prevents foggy windows, humidity problems, odours, rust and mould.

It can easily be regenerated in the microwave, near a radiator or in the sun.

## Application

Wall Protect Damp Absorber can be used in caravans, basements, garden sheds, bathrooms, wardrobes, cars, motor homes and boats.

## Advantages

- › 100% leakproof
- › Prevents condensation on windows and walls
- › Prevents musty odours and mould

## How do I use the product?

- Remove the plastic wrap around the Wall Protect Damp Absorber to activate it.
- Place the damp absorber in the space and prevent the bag from sliding.
- Wall Protect Damp Absorber has an absorption capacity of up to 800 ml. It remains active for about 4 months. After this time, you can regenerate the moisture absorber.
- Regenerate Wall Protect Damp Absorber by evaporating the absorbed moisture in the microwave.
- Place the bag in the middle of the microwave for 10 min. at 600 watts.
- Allow the bag to cool for about 5 min. Turn the Wall Protect Damp Absorber over and return the bag to the microwave for another 10 min. at 600 watts.
- The bag is now completely dehydrated.

Material	Colour	Contents	Drying time
Bentonite and Calcium Chloride (< 10%)	Black	1 kg	2 x 10 min. (600W)
