

ROOF PRIMER MULTI

Bonding varnish for non-bituminous roof coatings

PRODUCT DATA SHEET

Product description

Ready-to-use, colourless, quick-drying bonding varnish for preparing different types of substrates before applying a non-bituminous roof coating such as the reflective coating Roof Paint Reflect White, Roof Coating Expert or Roof Seal Expert. Thanks to its highly penetrating power, **ROOF PRIMER MULTI** fixes residual dust and absorbent surfaces, ensuring optimum adhesion between the roof coating and the substrate. Thanks to its quick-drying properties, the roof coating can be applied after only 30 minutes. Moreover, **ROOF PRIMER MULTI** forms a barrier that prevents substrate substances from penetrating into the coating layer.

Application

For use on bitumen, metal, cement, tiles, slates and EPDM. **ROOF PRIMER MULTI** can also be applied to new bitumen roofs that are at least 6 months old.

Advantages

- › Dries quickly
- › For all substrates
- › Ensures optimum adhesion

How much product do I need?

For one coat use approx. 0.75 litre per 5 m².

See also the calculator on our website www.aquaplan.com.

Handy tips?

- Store in a dry, cool and frost-free place in a hermetically sealed container.
- Use in ambient temperatures between 5°C and 30°C and in dry weather.
- Clean your tools with white spirit or turpentine.

Material	Colour	Contents	Coverage	Drying time	Coats	Overpaintable
Primer	Transparent	0,75 L	About 5 m ² /0,75 L	About 30 min.	1	Yes

ROOF PRIMER MULTI

Bonding varnish for non-bituminous roof coatings

INSTRUCTIONS

What do I need?

How do I prepare the surface?

- Always work on a sound, clean, dust-free and dry surface free of loose particles.

How do I use the product?

- Apply one coat of **ROOF PRIMER MULTI** with a brush or roller, using approx. 0.15 l/m².
- Wait 30 minutes before applying Roof Paint Reflect White or any other non-bituminous roof coating.
