Cold asphalt	Black	25 kg	25 kg/m ² per cm thickness with a max. of 3 cm	/	1	Yes

ROAD REPAIR ASPHALT FILLER

Repair asphalt roads

INSTRUCTIONS

What do I need?

How do I prepare the surface?

- Cut out the damaged area, creating straight lines.
- Use a steel brush to clean the surface.
- Remove water and dirt.

How do I use the product?

- Place **ROAD REPAIR ASPHALT FILLER** in the cavity and spread it out with a rake. Tamp it down with a tamper or other suitable tool.
- When working in high temperatures, we recommend sprinkling some sand on the **ROAD REPAIR ASPHALT FILLER**.
- After compaction, the layer of **ROAD REPAIR ASPHALT FILLER** should not be thicker than 3 cm (= 2 x 1.5 cm). If the damage is deep, a layer of crushed stone (calibre 0/22) should be applied and tamped down first.
- You can treat the surface with **ROAD REPAIR ASPHALT REFRESH** afterwards, but you should wait at least 1 month.
