

ROOF GLUE SHINGLES

Cold glue for fixing shingles

Product description

Elastic, watertight and weather-resistant bitumen cold glue for improving the adhesion of shingles on roofs exposed to wind. Cold glue is also recommended for securing shingles on roofs with a pitch greater than 60°. It can also be used to seal cracks and tears in shingle roofs and for waterproofing roof details.

Application

For securing bitumen roof slates or shingles.

Advantages

- › Reinforced with fibres
- › Makes roof details watertight
- › For wind-prone areas and steep roofs
- › Prevents blistering

How much product do I need?

With 1 kg **ROOF GLUE SHINGLES** you can install approx. 25 m² of shingles.

Handy tips?

- **ROOF GLUE SHINGLES** is made from special bitumen with fibres.
- Store in a cool, dry place.
- Do not apply if the ambient temperature is below +5°C or above +35°C.
- Clean your tools with white spirit or turpentine.

ROOF GLUE SHINGLES

Cold glue for fixing shingles

INSTRUCTIONS

What do I need?

How do I prepare the surface?

- First remove all dust and grease from the substrate.
- Remove any loose particles.
- If the substrate is very dirty, clean it with a pressure washer.
- Treat any green mould, lichens and algae with **GARDEN CLEAN GREEN REMOVER**.

How do I use the product?

- Stir the product well.
- Use a spatula to apply about a 25 mm strip of **ROOF GLUE SHINGLES** to each shingle.
- Press the shingle down firmly. Full adhesion is obtained after a few days.
