WALL PROTECT

OPTIMAL PROTECTION FOR YOUR WALLS

Damp interior walls

WALL PROTECT DAMP ABSORBER

1kg

Wall Protect Damp Absorber is a reusable moisture absorber that can be used again and again, making it an environmentally friendly and durable solution for controlling damp. It helps prevent condensation on windows, damp problems, unpleasant odours, rust and mould.

Wall Protect Damp Absorber can easily be regenerated in the microwave, near a radiator or in the sun.

- › 100% leak-proof
- › Prevents condensation on windows and walls
- › Prevents musty odours and mould

WALL PROTECT CONDENSATION STOP

2.5L - 5L

Decorative and insulating wall and ceiling coating designed to permanently prevent damp and mould caused by condensation.

- › Permanently combats mould
- › Insulating properties
- › Effective and long-lasting
- › Easy to apply with a paint roller

WALL PROTECT SEALER

0.75L - 2.5L

Breathable and transparent coating for the effective treatment of above-ground damp interior walls prior to painting or wallpapering. It forms a colourless and waterproof barrier against penetrating damp.

- › Long-lasting result
- › Excellent adhesion on both dry and damp surfaces
- › Apply before finishing with paint or wallpaper
- › Environmentally friendly, odourless and breathable

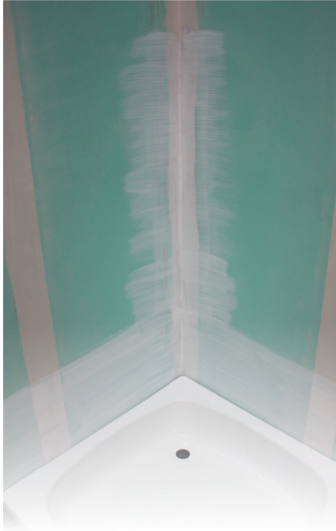

PROTECTION

Waterproofing sanitary areas

BATHROOM PROTECT

0.70L - 2L

Waterproof coating for making all horizontal and vertical surfaces 100% watertight before further finishing. Efficiently and decoratively waterproofs all surfaces in your bathroom or kitchen.

- › Waterproof barrier before tiling
- › Can be used on all types of surfaces
- › Suitable for walls and floors
- › Environmentally friendly and safe to use

WALL PROTECT

OPTIMAL PROTECTION FOR YOUR WALLS

Treating rising damp

WALL PROTECT INJECT CREAM

kit - 310ml

A solvent-free and ready-to-use injection gel to permanently repair rising damp in walls. Quick and easy to inject using a caulking gun into holes drilled in a horizontal mortar joint.

- › Ready-to-use injection gel
- › Effective and permanent
- › One treatment suffices
- › Suitable for interior and exterior walls
- › Injection hoses available separately

WALL PROTECT LIQUID INJECTOR KIT

kit - 5L - 10L

A colourless, professional injection fluid for permanently treating above-ground interior and exterior walls affected by rising damp. It forms a lifelong waterproof barrier inside the wall, preventing rising damp from penetrating further.

- › Lifetime protection
- › Wall continues to breathe so moisture can evaporate
- › Effective and long-lasting
- › Suitable for interior and exterior walls thicker than 40 cm

DPC WATERPROOF MEMBRANE

10/20/30/45cm x 30m

Rot-proof and tear-resistant waterproof plastic membrane that protects interior and exterior walls against rising damp. It has a textured profile for improved mortar adhesion and to prevent slippage.

- › Rot-proof and tear-resistant
- › Excellent mortar adhesion thanks to the textured profile
- › Does not slip thanks to textured profile
- › Easy to cut or trim

PROTECTION

Protection against penetrating rain

WALL PROTECT QUICK JOINT

310ml

Wall Protect Quick Joint from Aquaplan is a ready-to-use joint repair mortar for repairing mortar joints in masonry and cracks in concrete. Wall Protect Quick Joint is very easy to apply with a caulking gun.

The joint repair compound adheres well to most building materials and becomes rain-resistant after just a few hours. It can be sanded and painted over.

- › Ready to use straight away
- › Quick & easy to apply with a caulking gun
- › Paintable

RAIN PROTECT HYDROFUGE LIQUID

0.75L - 4L - 10L

Solvent-free, odourless and colourless water-repellent breathable coating that protects all vertical unpainted interior and exterior walls against penetrating rain and dirt. Contains no harmful organic solvents and can also be used indoors.

- › Colourless protection for interior and exterior wall
- › Protects against penetrating rain and dirt
- › Environmentally friendly and safe to use
- › Easy to apply

RAIN PROTECT HYDROFUGE CREAM

2.5L - 5L

A colourless and water-repellent cream designed to protect exterior walls against penetrating rain and dirt. Rain Protect Hydrofuge Cream penetrates deep into all porous surfaces and provides a durable, breathable moisture barrier against water penetration. This prevents frost damage and combats the formation of moss. Thanks to its high concentration, only one coat is required.

- › Colourless and breathable
- › One coat is sufficient for long-lasting protection
- › Protects against penetrating rain and dirt
- › Environmentally friendly and safe to use

OPTIMAL PROTECTION FOR YOUR WALLS

Protection against penetrating rain

RAIN PROTECT HYDROFUGE WHITE

2.5L - 10L

Rain Protect Hydrofuge White from Aquaplan is a highly covering and elastic façade coating that protects your exterior walls against penetrating rain. Once dry, Rain Protect Hydrofuge White forms an elastic, moisture-resistant barrier that also helps protect against dirt and pollution. Thanks to its flexibility, the façade coating can also be applied to rough walls. Its specially developed formula also makes Rain Protect Hydrofuge White highly durable and UV-resistant. Fast-drying and 100% solvent-free.

- › Protects against driving rain
- › Seals pores and hairline cracks
- › Extreme covering power and highly durable
- › Easy to apply

RAIN PROTECT SPLASH GUARD

0.75L - 4L

Rain Protect Splash Guard from Aquaplan is a ready-to-use waterproof wall coating. The coating forms a waterproof layer that blocks moisture from penetrating your walls, thus protecting them against damp penetration. What's more, the unique formula of Rain Protect Splash Guard repairs and reinforces your dry and damp structures after only one coat. The coating is easy to apply, offers excellent coverage and dries quickly.

- › Waterproof after just one coat
- › Dirt-repellent and washable
- › Adheres to damp surfaces
- › Long-lasting protection

WALL PROTECT SALT STOP

1L - 5L

Wall Protect Salt Stop is a salt neutraliser that causes salts inside the masonry to crystallise instead of migrating to the surface. This prevents salts from affecting the appearance of the wall. It also improves adhesion with plaster and waterproof coatings.

- › Prevents salt deposits
- › Ideal primer for wall products
- › Reduces moisture transfer

PROTECTION

Protection against penetrating rain and groundwater

RAIN PROTECT MINERAL FINISH + BRUSH

10kg

Water-repellent limewash for exterior walls

Rain Protect Mineral Finish combines the authentic appearance of traditional limewash with the latest water-repellent technology. The product is ready to mix – simply add water – and thanks to its built-in water-repellent properties, no separate hydrophobic treatment is required.

This creates a durable protective barrier against rain, frost and dirt. Thanks to its easy application, the product is ideal for both renovation projects and new-builds.

- › Water-repellent
- › Breathable
- › Ready to mix

BLACK FOUNDATIONS

4L - 20L

Universal bituminous coating for waterproofing buried materials that come into contact with the ground on the outside. Quickly forms a moisture-resistant and strong protective layer. Can be applied in both summer and winter.

- › Fast-drying, quickly waterproof
- › Adheres to all surfaces
- › Seals all pores and hairline cracks
- › Suitable for use in winter and summer

FOUNDATION PROTECT EXPERT

4kg

Universal and elastic solvent-free bitumen emulsion for waterproofing all materials that come into contact with groundwater. For exterior use and can be applied to slightly damp surfaces.

- › Environmentally friendly and solvent-free
- › Forms a flexible and seamless coating
- › Adheres to all surfaces
- › Seals all pores and hairline cracks

OPTIMAL PROTECTION FOR YOUR WALLS

Protection against penetrating rain and groundwater

BASEMENT PROTECT LEAK STOP

1kg - 2.5kg

Fast-setting and expanding sealing compound for immediately stopping leaks in concrete and masonry, even under extremely high pressure. Provides an effective and permanent seal thanks to expansion during the curing process.

- › Dries very quickly
- › Seals leaks and joints between walls and floors
- › Anchors bolts, pipes and other objects
- › Works even under high pressure

BASEMENT PROTECT CEMENT SEALER

5kg - 10kg - 20kg

High-quality and durable white cement coating for waterproofing interior walls that are fully or partially below ground level and exposed to constant water pressure. Suitable for walls built with cement or concrete blocks.

- › Withstands high water pressure
- › Excellent adhesion, even on damp surfaces
- › Effective and long-lasting
- › Easy to apply with the Basement Protect Cement Sealer Brush

BASEMENT PROTECT EPOXY SEALER

1.5L - 4L

Wear-resistant and breathable two-component coating for waterproofing walls and floors that are fully or partially below ground level. Suitable for walls built with bricks or cement render.

- › Seals underground walls exposed to water pressure
- › Penetrates deep into the surface and reinforces the structure of the material
- › Decorative and paintable
- › Suitable for floors thanks to its wear-resistant properties

PROTECTION

Protection against groundwater and concrete floors

BASEMENT PROTECT FLEX PLUG

500gr

Sealing in and around penetrations

Basement Protect Flex Plug is a vapour- and waterproof sealing paste for sealing damp and pressurised water around penetrations. The sealing paste does not shrink or dry out and always remains flexible. This allows cables to be added through the penetration without removing the seal.

- › Can withstand high water pressure
- › Permanently flexible
- › Both inside and around penetrations

FLOOR PROTECT EXTREME

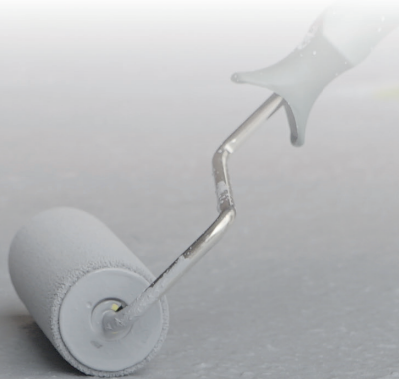

1L - 4L

A durable and water-repellent floor coating for protecting concrete floors against repeated loads, particularly from cars. It prevents wear and tear caused by hot tyres and protects the surface against stains, grease and road salt.

Thanks to its special formula, the coating is water-repellent and easy to clean with ordinary detergents.

- › Wear-resistant floor coating
- › High resistance to repeated loads
- › Protects against stains, grease and road salt
- › Suitable for porous cement and concrete floors
